CORE SKILLS

LANGUAGES

Swift, Python, TypeScript,
JavaScript, Java, C++, SQL, HTML,
CSS

FRONTEND

React, Next.js 16, Vite, Tailwind CSS
v4, GSAP, Framer Motion, Three.js,
shadcn/ui

MOBILE

SwiftUI, UIKit, Xcode, Core Data,
MapKit, React Native, Expo

AI & AUTOMATION

Claude API, OpenAI API, MCP
protocol, AI agent orchestration,
prompt engineering, autonomous
multi-agent systems

BACKEND

Node.js, tRPC, REST APIs, GraphQL,
Supabase, Firebase, MySQL,
PostgreSQL

DEVOPS & TOOLS

Git, GitHub, Vercel, Cloudflare,
CI/CD, Stripe, eBay API, OAuth 2.0,
WCAG/VPAT

PROFILE

I build across AI, web, and mobile, and ship it.

Forward Deployed Engineer with 6+ years building and shipping production software end to end, close to the customer. I architect and run a multi-agent AI build pipeline, have designed and deployed 80+ live web applications, and built native iOS apps for Fortune 500 clients. I move fluently across AI systems (Claude API, MCP, multi-agent orchestration), full-stack web (React, Next.js, TypeScript), and native iOS (Swift, SwiftUI), and I own the full lifecycle from design through deployment and the customer relationship.

SELECTED PROJECTS

IGRIS — Autonomous AI Build System

React · Next.js · Claude API · MCP

Architected an AI-powered system that autonomously generates award-winning websites through a four-phase pipeline (Brief → Design → Atomization → Execution) with multi-agent orchestration. Produces agency-quality output in hours that traditionally costs \$5K–\$50K+.

Multi-Agent AI Operating System

Claude API · MCP · file-substrate · receipts

Architected a file-based, multi-agent system: dozens of specialized agents coordinated over a file substrate, with hash-chained receipts for full auditability and deterministic guardrails over LLM judgment. Includes Bastion, a privacy broker that lets cloud LLMs work on local data through redaction and policy enforcement, and Genesis Kit, a template framework for spinning up new agents.

Mac Mini Scan — Real-Time Apple Store Inventory Locator

Python · web scraping · monitoring

Built a locator that tracks Mac Mini and Mac Studio availability across every Apple Store in the US in real time, built for the supply shortage driven by surging RAM demand and local-AI adoption. Used it to source and resell just under a dozen units, generating close to \$10,000 in a single month.

BuildWhatYouWant — AI Sales Conversion Platform

Next.js · Tailwind · Stripe · Supabase

Developed a platform that sources leads via Google Business API, generates AI landing pages, delivers previews via QR-code with PIN access, and processes orders through Stripe with industry-specific add-ons.

EDUCATION

New Jersey Institute of Technology

B.S. Information Technology
Minors: Computer Science & Web Information Systems
Newark, NJ · 2013 – 2019

CERTIFICATIONS

Business Technology

Certified 2010

SELECTED LIVE WEBSITES

80+ bespoke business websites designed and deployed to production — each individually built (no templates), responsive, and live in the browser. A curated selection, best-first:

- | | | | |
|---|------------|---|-----------------|
| – Ramen Gami ↗ | Restaurant | – Six Points Creative ↗ | Creative Studio |
| – Alpha Daycare Center ↗ | Childcare | – Cantina 443 ↗ | Restaurant |
| – East Orange Animal Hospital ↗ | Veterinary | – More More Now Records ↗ | Record Shop |
| – My Amor Coffee ↗ | Cafe | – Kador Beauty Salon ↗ | Beauty Salon |
| – Vega Jewelry ↗ | Jewelry | – GQ Cutz ↗ | Barbershop |

Full portfolio of all 80+ live websites at [bysemaj.com](#)

EXPERIENCE

Founder & Forward Deployed Engineer · BuildWhatYouWant

June 2024 – Present · Newark, NJ (Remote)

- Founded an AI orchestration company. Built IGRIS, an extensible multi-agent engine on the Claude API and MCP that composes a growing toolkit of third-party APIs and MCP servers to autonomously generate production websites.
- 80+ live business websites built through the orchestration and hosted on the platform, scaling toward hundreds; productized with Stripe payments and webhooks, JWT auth, per-business QR access, and a field-operations tool.

Founder & Engineering Lead · ThinkQueue

March 2021 – June 2024 · Newark, NJ (Remote)

- Founded and led a global product development agency building native mobile apps, websites, and PWAs for clients, with a distributed team across 8 countries.
- Delivered bespoke products end to end through a structured, multi-stage build process; originated the idea to automate it with AI agents, which became IGRIS and BuildWhatYouWant.

IT Consultant · StationMD

May 2020 – Present · Maplewood, NJ

- Built custom QR code generation system in Python, eliminating third-party API dependency
- Developed native mobile applications for both Android and iOS platforms
- Shipped a Progressive Web App, expanding platform reach to all device types
- Administered MySQL database operations and executed WCAG/VPAT accessibility compliance to AA standards

iOS Developer — Immersive Bootcamp *Nov 2022 – Jan 2023 · Jersey City, NJ*

- **Apolis**
 - Completed advanced iOS program focused on Swift, SwiftUI, and production architecture (MVVM, Clean Architecture)
 - Built applications integrating Core Data, MapKit, push notifications, and CI/CD pipelines
 - Translated UX/UI designs into functional, accessible iOS applications
-

Junior iOS Developer • **Mobile Consulting Solutions** *Sep 2019 – Feb 2020 · Atlanta, GA*

- Developed iOS applications for Fortune 500 client engagements using Swift and UIKit
 - Integrated Firebase, Core Data, and third-party SDKs into production mobile applications
 - Participated in full development lifecycle from design collaboration through deployment
-

Earlier Experience

- **Legal Transcriptionist**, eScribers, LLC — 2022 · 118 WPM at 98% accuracy
- **Engineering & Robotics Teaching Assistant**, NJIT — 2014–2018 · taught Java, C++, robotics to students 13–17
